## What is Anti-Oxidation ???

Human body is made up of 30-40 trillion cells. When cells grow old or when we have irregular lifestyle, some of the absorbed oxygen changes into active oxygen.

### Oxidation

### Oxidation = The “Rusting” Process

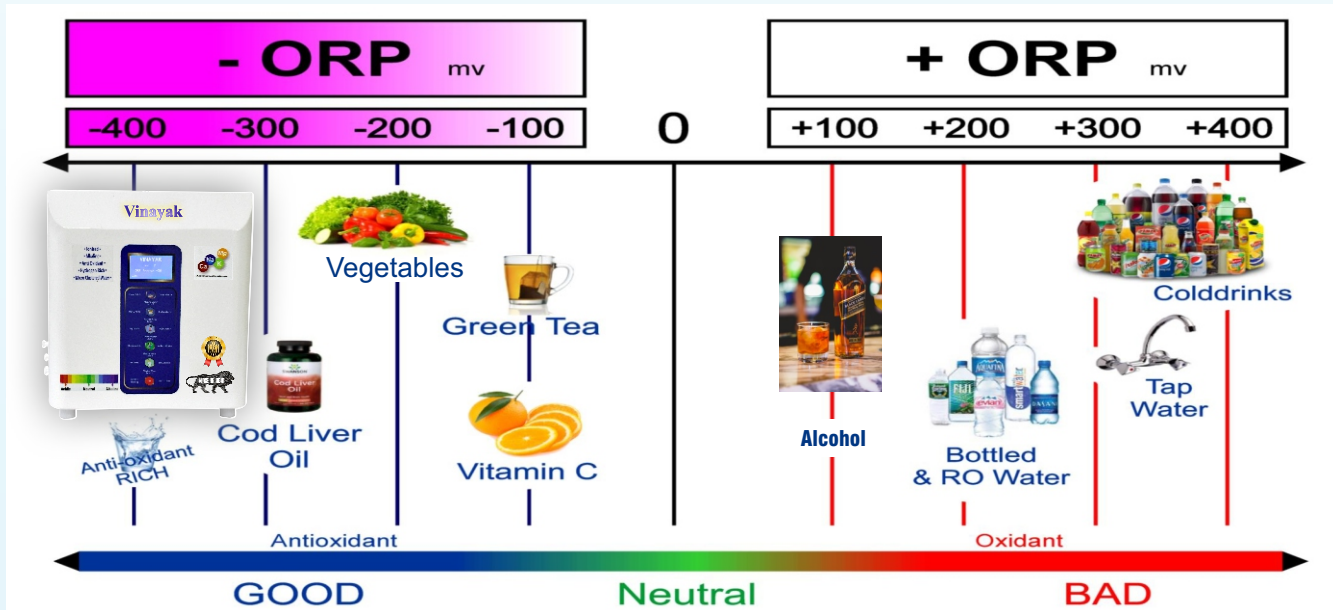

# ORP-OXIDATION REDUCTION POTENTIAL

3T TRUTH \* TRUST \* TRANSPARENCY

The Higher the Negative Number of ORP The Greater the potential to reduce the Levels of Oxidation in the body.

# 3. Alkalinization

## What is Alkalinization???

Alkaline rich water helps in balancing body's pH, which tends to be acidic because of our high acidic food diet, stress & exposure to environmental toxins such as smog. Alkalinization maintains your body's pH from acidic to alkaline, because cancer and many other illness cannot live in alkaline environments.
